Election/Restrictions

1. Applicant's election with traverse of Species I (Figure 2) claims 1-9 are read on in the reply filed on 3/19/2009 is acknowledged. Non-elected claims 10-24 are withdrawn from consideration. The traversal is on the ground(s) that a reasonable number of species are permitted in a single application. The present application contains four species, which should be considered to be a reasonable number of species. Further, examination of all species together in one application would not place an undue burden on the Examiner. It is respectfully submitted that the Examiner's Election of Species Requirement is improper in view of the fact that a reasonable number of species are set forth in the present application, and such is permitted by Rule 146. This is not found persuasive. The applicant is referred to MPEP 809.02 (a), which states the requirements for an election of species requirement. Note especially section (B) which states that "the species are preferably identified as the species of figures 1, 2, and 3" and that the distinguishing characteristics of the species should be states only "in the absence of distinct figures of examples".

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The requirement is still deemed proper and is therefore made FINAL.

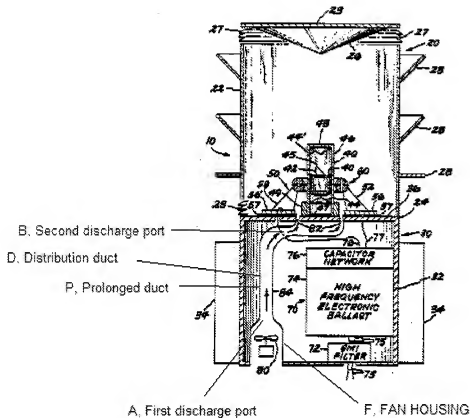

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 8-9, 17-18, 22-23 are rejected under 35 U.S.C. 102(b) as being anticipated by El-Hamamsy et al (US 4,910,439). El-Hamamsy discloses a high intensity discharge electrodeless lamp comprising a cases (32) in which inner components are mounted; and a fan housing (F, Figure below) having at least two discharge ports (A, B, and 82) having different discharge flow rates to cool heat generation components in the case (32) by introducing external air in the case.

4. Claims 6-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
